2   Definitions

Term	Definition and Information
Subscriber	The subscriber is the receiver of the newsletters. He's able to register at the system and able to select different topics as content of his personal "newsletter-set".
Author	An author is the creator of an Article. One or more Authors are able to work on one article. The author has to send the complete article to the editor who will input it into the system. They have to obey a template.
Editor	The editor is the main character in the system. He manages the different topics of the system and inputs the articles from the author. The editor is able to request articles from an author which is not treated in the application. He's also able to create the newsletter issues. At any time he can select his personal list of the most important articles and send them to the subscribers.
Electronic Newsletter Application	This is the name of our system which handles newsletters.
Activation Code	It's an expression with 8 digits to validate the email address.
